The ABC calculation is as follows: Identify all the activities required to create the product. Divide the activities into cost pools, which includes all the individual costs related to an activity—such as... Assign each cost pool activity cost drivers, such as hours or units. Calculate the cost ...

[Activity Based Costing \(ABC\) Definition](#)

Activity-based costing identifies and measures the costs of performing the activities that go into a product much better than traditional cost methods. For example, if a particular jacket requires 10 inspections for a production run of 1,000 jackets, we figure out the cost of those inspections and assign that cost to the production run for this particular jacket.
