As it observes in its first pages, there are some principles of public administration that are widely accepted today. " These principles should include transparency and accountability, participation and pluralism, subsidiarity, efficiency and effectiveness, and equity and access to services ".

The public administration is above all for us, the protection of our rights and the pursuit of the public good. This handbook will be of interest to all those concerned with the proper functioning of public administration: individuals who apply for public services and action and the public officials who process their applications; lawyers, judges and ombudspersons involved in the review of the public administration ' s activities; and policy makers and legislators concerned with public administration reform. It sets out and explains the substantive and procedural principles of administrative law concerning relations between individuals and public authorities, with commentary backed up by references to the Council of Europe legal instruments (conventions, recommendations and resolutions) from which each principle is drawn and to the relevant case law of the European Court of Human Rights.

Good Administration and the Council of Europe: Law, Principles, and Effectiveness examines the existence and effectiveness of written and unwritten standards of good administration developed within the framework of the Council of Europe (CoE) and in the case law of the European Court of Human Rights. These standards - called 'pan-European general principles of good administration' - cover the entire range of general organizational, procedural, and substantive legal institutions meant to ensure a democratically legitimized, open, and transparent administration respecting the rule of law. They are about the 'limiting function' of administrative law: its function to protect individuals from arbitrary power, to legitimize administrative action, and to combat corruption. This book analyses the sources and functions of the pan-European general principles of good administration and seeks to uncover how deeply they are rooted in the domestic legal systems of the CoE Member States. It comprises 28 country reports dedicated to an in-depth exploration of the impact of these standards on the national legal systems of the Member States written by respective experts on these systems. It argues that the pan-European general principles of good administration lead to a certain harmonization of the legal orders of the Member States with regard to the limiting function of administrative law despite the many fundamental differences between their administrative and legal systems. It comes to the further conclusion that the pan-European general principles of good administration can be considered as a concretization of the founding values of the CoE and describes the 'administrative law obligations' a Member State entered into when joining the CoE.

Administration in the Public Interest is a highly readable, informative, and up-to-date introductory textbook for undergraduate public administration and first-year graduate MPA students. In addition to covering the basic topics found in most introductory public administration texts, such as organizational theory and behavior, public personnel, public budgeting, federalism and intergovernmental relations, public management, and the like, this book devotes entire chapters to the history and philosophy of public administration, the role of the Constitution and administrative law and behavior, administration and management of state and local governments, and treatment of the use of nonprofit organizations and faith-based initiatives in public administration. Instead of civil service preparation for M.P.A. students Administration in the Public Interest presents a current-issues theme of conflicting ethical, constitutional, utility, and leadership values discovered and practiced in public administration. The primary purpose of the text is not necessarily to teach the practice of public administration; instead, Administration in the Public Interest critically examines and evaluates the various ideas, people, histories, typologies, and issues that interrelate within the broad philosophical and pragmatic world of the public interest. Unlike almost all public administration texts, this book describes and examines the increasingly influential role of non-profit organizations, faith-based initiatives, and private agencies in the development of public administration. Each chapter includes Action Steps for their local setting, boxed inserts and photos on key figures and events in public administration, study guides, including discussion and review questions, recommended readings, and web sites.
