Capitalism in the Web of Life: Author Meets Critics Professor Jason W. Moore - Capitalism in the Web of Life Anti-Capitalist Chronicles: The Essence of a Capitalist Society Shoshana Zuboff on surveillance capitalism | VPRO Documentary ~~Alan Greenspan and Adrian Wooldridge, "Capitalism in America"~~ ~~Wolff Responds: Why Capitalism is NOT a Market System Critique of Capitalism~~ ~~Jason W. Moore~~ The Problems With Capitalism, Big Tech, and Monopoly Power Wolff Responds: U.S. Turn Toward Economic Nationalism Jason W. Moore: The Web of Life The Predictable Rise of Conscious Capitalism Self-Help Won't Fix Capitalism ~~AskProfWolff: Capitalism u0026amp; Morality~~ Why Capitalism is Better than Socialism Capitalism Is Real ~~AskProfWolff: Zero Growth Capitalism~~ Wolff Responds: The Eviction Crisis and US Capitalism's Self-destruction ~~Zero Squared #108: The Subject of Capitalism~~ ~~The Intellectual Dark Web Doesn't Understand Marx~~ Wolff Responds: US Capitalism's Fake News on Iran and China Capitalism In The Web Of Capitalism in the Web of Life will undoubtedly help to change that. Charting the recurrent crises, and long cyclical expansions of capitalism as socio-ecological process over the past six centuries, Jason Moore provides a groundbreaking theory and historical account of capitalism's development that comprehends the transformation of nature as constitutive of capital accumulation.

Capitalism in the Web of Life: Ecology and the ...

In Capitalism in the Web of Life, Jason W. Moore argues that the sources of today's global turbulence have a common cause: capitalism as a way of organizing nature, including human nature. Drawing on environmentalist, feminist, and Marxist thought, Moore offers a groundbreaking new synthesis: capitalism as a "world-ecology" of wealth, power, and nature.

Verso

Capitalism in the Web of Life shows how the critique of capitalism-in-nature-rather than capitalism and nature-is key to understanding our predicament, and to pursuing the politics of liberation in the century ahead. 2015 publication, written by Jason W. Moore. In good condition, slight wear to the corners of the pages and the spine.

Jason W Moore, Capitalism in the Web of Life. Ecology and the Accumulation of Capital (Verso 2015), xi, 316pp. There is a strand of green thought which holds that the root of all our environmental problems is that human activity has too much effect on the natural world. The solutions range from the exhortation to "tread lightly upon the Earth" to the deep green proposal to restrict human habitation to the coasts, but the belief that stopping human society from affecting nature is ...

Capitalism in the Web of Life: Ecology and the ...

Capitalism in the Web of Life reflects two decades of reflection and study at the nexus of two great concerns: the history of capitalism and environmental history. It has been a long, productive, exciting, and often tumultuous, journey. This book's ideas were formulated on both coasts of North America, on both sides of the Atlantic, at eight

Capitalism in the Web of Life is about how the mosaic of relations that we call capitalism work through nature; and how nature works through that more limited zone capitalism. - is double movement"of capitalism through nature of nature through capitalism" is what I call the "Double Internality".

Capitalism in the Web of Life - Jason W. Moore

Capitalism is the social system of the Enlightenment, founded on a philosophy based on reason, egoism, and freedom. The term capitalism (from the Latin word *capta*, meaning "head") is used here in the broader philosophical sense, and not in the narrower economic sense, i.e., a free market. Capitalism is the social system of and for the human mind. Capitalism is not just an economic system that can be grafted onto any political structure, but is an integrated social system that depends on ...

The Capitalism Site | Capitalism is the ideal social system

Capitalism is a widely adopted economic system in which there is private ownership of the means of production. Modern capitalist systems usually include a market-oriented economy, in which the production and pricing of goods, as well as the income of individuals, are dictated to a greater extent by market forces resulting from interactions between private businesses and individuals than by central planning undertaken by a government or local institution.

Capitalism in the Web of Life by Jason W. Moore ...

Capitalism in the Web of Life is a menace! It is a menace to all those who think that there is only one Marxist understanding of the capital-nature relation. It is a menace to all those academic writers who think there is no place for colorful prose.

Integrating both social and historical factors, this radical analysis of the development of capitalism reveals the ever-deepening relationship between capital and ecology Finance. Climate. Food. Work. How are the crises of the twenty-first century connected? In *Capitalism in the Web of Life*, Jason W. Moore argues that the sources of today's global turbulence have a common cause: capitalism as a way of organizing nature, including human nature. Drawing on environmentalist, feminist, and Marxist thought, Moore offers a groundbreaking new synthesis: capitalism as a "world-ecology" of wealth, power, and nature. Capitalism's greatest strength—and the source of its problems—is its capacity to create Cheap Natures: labor, food, energy, and raw materials. That capacity is now in question. Rethinking capitalism through the pulsing and renewing dialectic of humanity-in-nature, Moore takes readers on a journey from the rise of capitalism to the modern mosaic of crisis. *Capitalism in the Web of Life* shows how the critique of capitalism-in-nature—rather than capitalism and nature—is key to understanding our predicament, and to pursuing the politics of liberation in the century ahead.

Introduction -- Cheap nature -- Cheap money -- Cheap work -- Cheap care -- Cheap food -- Cheap energy -- Cheap lives -- Conclusion

Shows that, with wise and informed policymaking, the American entrepreneurial engine can rally and the true potential of the economy can be unlocked.

The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research,

Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new "behavioral futures markets," where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new "means of behavioral modification." The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a "Big Other" operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled "hive" of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.

The Earth has reached a tipping point. Runaway climate change, the sixth great extinction of planetary life, the acidification of the oceans--all point toward an era of unprecedented turbulence in humanity's relationship within the web of life. But just what is that relationship, and how do we make sense of this extraordinary transition? *Anthropocene or Capitalocene?* offers answers to these questions from a dynamic group of leading critical scholars. They challenge the theory and history offered by the most significant environmental concept of our times: the Anthropocene. But are we living in the Anthropocene, literally the "Age of Man"? Is a different response more compelling, and better suited to the strange--and often terrifying--times in which we live? The contributors to this book diagnose the problems of Anthropocene thinking and propose an alternative: the global crises of the twenty-first century are rooted in the Capitalocene; not the Age of Man but the Age of Capital. *Anthropocene or Capitalocene?* offers a series of provocative essays on nature and power, humanity, and capitalism. Including both well-established voices and younger scholars, the book challenges the conventional practice of dividing historical change and contemporary reality into "Nature" and "Society," demonstrating the possibilities offered by a more nuanced and connective view of human environment-making, joined at every step with and within the biosphere. In distinct registers, the authors frame their discussions within a politics of hope that signal the possibilities for transcending capitalism, broadly understood as a "world-ecology" that joins nature, capital, and power as a historically evolving whole. Contributors include Jason W. Moore, Eileen Crist, Donna J. Haraway, Andreas Malm, Elmar Altvater, Daniel Hartley, and Christian Parenti.

Believe in climate change. Or don't. It doesn't matter. But you'd better understand this: the best route to rebuilding our economy, our cities, and our job markets, as well as assuring national security, is doing precisely what you would do if you were scared to death about climate change. Whether you're the head of a household or the CEO of a multinational corporation, embracing efficiency, innovation, renewables, carbon markets, and new technologies is the smartest decision you can make. It's the most profitable, too. And, oh yes--you'll help save the planet. In *Climate Capitalism*, L. Hunter Lovins, coauthor of the bestselling *Natural Capitalism*, and the sustainability expert Boyd Cohen prove that the future of capitalism in a recession-riddled, carbon-constrained world will be built on innovations that cutting-edge leaders are bringing to the market today. These companies are creating jobs and driving innovation. *Climate Capitalism* delivers hundreds of in-depth case studies of international corporations, small businesses, NGOs, and municipalities to prove that energy efficiency and renewable resources are already driving prosperity. While highlighting business opportunities across a range of sectors--including energy, construction, transportation, and agriculture technologies--Lovins and Cohen also show why the ex-CIA director Jim Woolsey drives a solar-powered plugin hybrid vehicle. His bumper sticker says it all: "Osama bin Laden hates my car." Corporate executives, entrepreneurs, environmentalists, and concerned citizens alike will find profitable ideas within these pages. In ten information-packed chapters, *Climate Capitalism* gives tangible examples of early adopters across the globe who see that the low-carbon economy leads to increased profits and economic growth. It offers a clear and concise road map to the new energy economy and a cooler planet.

The global economy is dominated by a powerful set of established and emerging capitalisms, from the long-standing capitalist economies of the West to the rising economies of the BRIC (Brazil, Russia, India and China) countries. An understanding of capitalism is therefore fundamental to understanding the modern world. *Capitalism: The Basics* is an accessible introduction to a variety of capitalisms and explores key topics such as: the history of major capitalist economies; the central role played by both states and markets in the global economy; the impact of capitalism on wages, workers and welfare; approaches to the analysis of capitalism, and choices for capitalism's future. Examining capitalism from both above and below, featuring a range of case studies from around the globe, and including a comprehensive glossary, this book is the ideal introduction for students studying capitalism.
