Chinese Naval Shipbuilding: An Ambitious and Uncertain ...

China's shipbuilding industry has grown more rapidly than any other in modern history. Commercial shipbuilding output jumped thirteen-fold from 2002-12, ensuring that Beijing has largely reached its goal of becoming the world's leading shipbuilder. Yet progress is uneven, with military shipbuilding leading overall but with significant weakness in propulsion and electronics for military and ...

Chinese Naval Shipbuilding An Ambitious And Uncertain ...

The evidence suggests that whereas China currently has numerous gaps in its naval shipbuilding industry, it is rapidly adapting to new and emerging technologies and adopting naval standards that will encourage continuous improvement in areas such as research, design, system and component production, quality, survivability as well as related fighting capabilities.

Chinese Naval Shipbuilding: An Ambitious and Uncertain ...

Andrew Erickson's Chinese Naval Shipbuilding: An Ambitious and Uncertain Course thoughtfully, clearly, and factually presents the many facets of China's commercial and naval shipbuilding ambition and the sobering scope of that national enterprise. To project China's direction and pace in maritime and global affairs and their impact on U.S. maritime power without absorbing the insights of this book's extraordinary contributors would be a huge mistake and a sure way to get the future wrong.
