The Paediatrics volume, fully revised and updated in this third edition, focuses on the following topics: \* Growth problems \* Developmental delay \* Failure to thrive \* Acute severe illness \* Acute and chronic fever \* Respiratory problems \* Fits, faints and funny turns \* Headache \* Diarrhoea and vomiting \* Abdominal pain \* Jaundice \* Rashes \* Poisoning \* Emotional and behavioural problems

You've read your textbook and your course notes. Now you need to apply your knowledge to real life clinical situations. The problem-solving approach of Core Clinical Cases guides you to think of the patient as a whole, rather than as a sequence of unconnected symptoms. With its emphasis on everyday practice strongly linked to underlying theory, the series integrates your knowledge with the realities of managing clinical problems, and provides a basis for developing sound analytical and confident decision-making skills. The core areas of undergraduate study are covered in a logical sequence of learning activities: the same questions are asked of each clinical case, followed by detailed explanatory answers. Related OSCE counselling cases, with related questions and answers, also feature in each section.

Key concepts and important information are highlighted, and the reader-friendly layout reflects exactly the type of question you will encounter, making these volumes the perfect revision aid for all types of case-based examination. The Paediatrics volume, fully revised and updated in this third edition, focuses on the following topics: \* Growth problems \* Developmental delay \* Failure to thrive \* Acute severe illness \* Acute and chronic fever \* Respiratory problems \* Fits, faints and funny turns \* Headache \* Diarrhoea and vomiting \* Abdominal pain \* Jaundice \* Rashes \* Poisoning \* Emotional and behavioural problems Volumes in the Core Clinical Cases series remain absolutely invaluable in the run up to clinical, written or OSCE examinations, and ideal course companions for all undergraduate medical students at various stages in their clinical training.

Core Clinical Cases guides you to think of the patient as a whole, rather than as a sequence of unconnected symptoms. With its practical approach strongly linked to underlying theory, the series integrates your knowledge with the realities of managing clinical problems, and provides a basis for developing problem-solving skills. The core areas of undergraduate study are covered in a logical sequence of learning activities: each case is followed by a detailed answer, along with a number of OSCE-style questions to help you practise for the exam. Related OSCE counselling style questions and answers also feature at the end of each section. Key concepts and important information are highlighted, and the reader-friendly layout reflects exactly the type of question you will encounter, making the perfect revision aid for all types of case-based examination. Core Clinical Cases in Paediatrics provides the reader with a highly structured case history text wholly appropriate for all types of case-based examination. Key concepts and important information are highlighted, and the reader-friendly layout reflects exactly the type of question you will encounter, making these volumes the perfect revision aid for all types of case-based examination. The Obstetrics and Gynaecology volume, fully revised and updated in this third edition, focuses on the following topics: \* Early pregnancy problems \* Pregnancy dating and fetal growth \* Late pregnancy problems \* Labour \* Medical disorders of pregnancy \* Puerperium \* Abnormal uterine bleeding \* Amenorrhoea and menopause \* Incontinence and prolapse \* Neoplasia \* Discharge and pain\* Infertility \* Fertility control Volumes in the Core Clinical Cases series remain absolutely invaluable in the run up to clinical, written or OSCE examinations, and ideal course companions for all undergraduate medical students at various stages in their clinical training.

You've read your textbook and your course notes. Now you need to apply your knowledge to real life clinical situations. The problem-solving approach of Core Clinical Cases guides you to think of the patient as a whole, rather than as a sequence of unconnected symptoms. With its emphasis on everyday practice strongly linked to underlying theory, the

The 100 Cases series provides a novel learning and revision tool that works by guiding the reader through each clinical case in a highly structured manner. Each scenario provides details of the patient's medical history and the key findings of a clinical examination, together with initial investigation results data for evaluation. Key questions then prompt the reader to evaluate the patient, and reach a decision regarding their condition and the possible treatment plan, while the answer pages reveal the processes a clinician goes through in such situations. The volumes are designed with the student in mind, and include features to aid self-directed learning, clinical reasoning and problem-solving. 100 Cases in Paediatrics covers the following subject areas: Respiratory, Cardiology, Endocrinology and diabetes, Gastroenterology, Nephrology, Infections, Dermatology, Haematology, Oncology, Bones and joints, Neurology, Child and Adolescent Psychiatry, Neonatology, Miscellaneous

In times of rapid change experience is no longer a sufficient guide to practice. Taking the principles of evidence-based medicine this is the first guide to evidence-based management. It will help managers and clinicians to make a difference to their organisation. Illustrated with case studies designed for 'the reader in a hurry' the clear layout of this practical guide is based on a questioning approach of Why? When? Where? How? and Who? which demonstrates how to apply the best evidence in decision making and in assessing performance. Obstacles to practising evidence-based management in healthcare are described with explanations of how to overcome them. Health managers and clinicians with managerial responsibilities will find this book an essential guide. Leaders in health service organisations public health doctors and public sector managers will find it of great benefit in their work.

Each case prompts candidates to decide on the necessary investigations, set their own research objectives and direct their own learning. This book mirrors the format of 'Medical School and Foundation Year Assessment' so that candidates get familiar with what is expected of them.
