Filling in the Blanks is a book dedicated to helping policymakers, researchers, academics and teachers, better understand standardized testing and the Black-White achievement gap. This book provides a wealth of background information, as well as the most recent findings,

about testing and measurement concepts essential to understanding standardized tests. The book then reviews theories and research that has been conducted which explain the differences in performance between Black and White test takers on many standardized tests. Most notably, *Filling in the Blanks* presents several new theories that address why Black students do not perform as well as their White counterparts. These theories present very novel and innovative perspectives to understanding these test performance differences. The book ends with a host of recommendations that are intended to address the concerns and questions of several stakeholder groups.

In this engaging book, Amber Reed provides a new perspective on South Africa's democracy by exploring Black residents' nostalgia for life during apartheid in the rural Eastern Cape. Reed looks at a surprising phenomenon encountered in the post-apartheid nation: despite the Department of Education mandating curricula meant to teach values of civic responsibility and liberal democracy, those who are actually responsible for teaching this material (and the students taking it) often resist what they see as the imposition of "white" values. These teachers and students do not see South African democracy as a type of freedom, but rather as destructive of their own "African culture" —whereas apartheid, at least ostensibly, allowed for cultural expression in the former rural homelands. In the Eastern Cape, Reed observes, resistance to democracy occurs alongside nostalgia for apartheid among the very citizens who were most disenfranchised by the late racist, authoritarian regime. Examining a rural town in the former Transkei homeland and the urban offices of the Sonke Gender Justice Network in Cape Town, Reed argues that nostalgic memories of a time when African culture was not under attack, combined with the socioeconomic failures of the post-apartheid state, set the stage for the current political ambivalence in South Africa. Beyond simply being a case study, however, *Nostalgia after Apartheid* shows how, in a global context in which nationalism and authoritarianism continue to rise, the threat posed to democracy in South Africa has far wider implications for thinking about enactments of democracy. *Nostalgia after Apartheid* offers a unique approach to understanding how the attempted post-apartheid reforms have failed rural Black South Africans, and how this failure has led to a nostalgia for the very conditions that once oppressed them. It will interest scholars of African studies, postcolonial studies, anthropology, and education, as well as general readers interested in South African history and politics.
