Imagina las posibilidades The Imagina: espanol sin barreras textbook program provides a smooth transition between first-year and second-year Spanish texts. It is designed to elevate the teaching of intermediate Spanish and provide students with an active and rewarding learning experience by combining rich and thought-provoking content with the latest multimedia and web technologies taking your students on a cultural tour of the Spanish-speaking world through award-winning short films, documentaries, cultural readings, authentic literature, and contemporary music offering instructors the flexibility to tailor a

course to the particular needs of students without compromising content or rigor.

This book provides a view into the groundbreaking application of ethnographic tools and techniques to the understanding of undergraduate students and their use of information. The publication describes findings of the work at the University of Rochester River Campus Libraries and provides insight into how academic librarians might use these techniques on their own campuses.

After the highly successful launch of this popular, college-level intermediate French program, the Second Edition of Réseau: Communication, Intégration, Intersections expands upon the features that have made it so popular in two- and four-year colleges and universities around the world. Réseau conceives of the teaching of French as a holistic endeavor, not only in terms of language skills--speaking, listening, reading, and writing--but also in terms of cultural knowledge in the broadest sense. Based on the belief that knowledge of a second language and culture necessarily brings about a greater understanding not only of the world in an increasingly global context, but also of the individual self, the content and activities in Réseau offer students the opportunity to reflect on the differences between their own and French and Francophone cultures and experiment with the new identities that so many researchers suggest language learning can encourage.
