The second edition of Critical Company Law provides a framework in which to understand how the company functions in society and a thorough grounding in modern legal doctrine. It shows how modern company law is shaped by a multi-layered history of politics, ideology, economics and power. Through the lens of political economic theory the book shows how the company becomes the mechanism through which the state makes political choices about distributing societies' wealth and through which it responds to economic crises. The current law reflects an economy marked by a disjuncture between the low profits of the productive economy and the high profits of the finance economy. Critical Company Law examines areas of company law to show how they reflect a fragile economy inexorably drawn to social and economic inequality and short-termism. These include: • The Doctrine of Separate Corporate Personality • Groups of Companies and Tort Liabilities • Company Formation and the Constitution • Directors' Duties and Authority • Corporate Capacity • Shares and Shareholders • Raising and Maintaining Capital • Minority Protection In this uniquely hybrid book the legal topics are treated with detail and clarity, providing an engaging introduction to the key topics required for a student of company law.

The first textbook to consider gender perspectives in relation to the whole undergraduate law curriculum in England and Wales. Gender is of central importance in every area of law and every area of people's lives but is rarely mentioned in the formal LLB syllabus; this book is designed to fill some of those gaps. 18 chapters, written by experts in the field, cover all the core modules on the English LLB together with 11 of the most popular options. Aimed at students and lecturers on undergraduate and postgraduate Gender and Law modules, the book will also be useful for all LLB and LLM students studying English law, who may use it to accompany their studies from their first to their final year, and also for prospective law students, legal scholars from outside England and Wales, and scholars in other disciplines.

This textbook is an introduction to more advanced writings on criminal law, primarily designed to allow students to think critically and analyse specific topics. Each chapter is structured around key questions and debates that provoke deeper thought. It asks questions such as: Why do we have the laws that we have? Could the criminal law look differently? How should the law be applied to novel situations? Does the law in fact reflect prejudices? The aim of the book is not to present a complete overview of theoretical issues in criminal law, but rather to illustrate the current debates among those working in shaping the area. The text features summaries of the views of notable experts on key topics and each chapter ends with a list of guided further reading. New to this Edition: - A new debate on the law on body modification - Fresh discussion of the law on dishonesty - Important new case law on causation - Detailed discussion of developments on the law on accessory - Significant developments on the law on sexual offences
