David Griffiths: Introduction to Electrodynamics. Here are my solutions to various problems in David J. Griffiths's textbook Introduction to Electrodynamics, Third Edition. Obviously I can't offer any guarantee that all the solutions are actually correct, but I've given them my best shot. These solutions are the only ones that I've worked out so far, so please don't ask me to post "the rest of ...

David Griffiths: Introduction to Electrodynamics. Unfortunately, due to a DMCA (copyright) complaint from the publisher of Griffiths's textbook Introduction to Electrodynamics, I must remove my solutions to the problems. Although my solutions were actually my own work and were not copied from any published source, they probably do duplicate to some extent the solutions in the solutions manual, so I can understand why the publisher lodged the complaint.

Show that the standing wave $f(z, t) = A \sin(kz) \cos(kvt)$ satisfies the wave equation, and express it as the sum of a wave traveling to the left and a wave traveling to the right (Eq. 9.6).
Equation 9.6 $f(z, t) = g(z - vt) + h(z + vt)$. Get solution.

Prof. David Griffiths's new book, Revolutions in Twentieth-Century Physics, performs double duty as a layman's physics text and as an intellectual history of the century that most fundamentally altered humankind's understanding of the universe. Deceptively slim, but powerfully expository, this book provides an overview of the mind-bending discoveries of 20th-century physics in just five ...
