Internet crimes, especially identity thefts, financial scams and a large variety of other types of frauds are becoming more and more common in the Internet world. And because Internet devices are becoming more widely used every day, those crimes are currently becoming and will naturally keep becoming more and more prevalent. It is up to us to make sure we will not become victims of these scams by protecting ourselves and our personal data as much as we possibly and reasonably can. This book is aimed at people who have zero to intermediate computer and Internet knowledge. Everything is written in a way to be easily understood even if you've never – or almost never, used a computer and the Internet. The objective of this book is to be a totally comprehensive resource about computer, mobile and Internet safety. In other words, this book could be the first and last online safety book that you read and you will know everything that you need to know to stay as safe as you can be online.
