This book offers a unique understanding of African American populations and their articulation of sexuality and race by introducing a comprehensive sexological model, Black Sexual Epistemology. Tracie Q. Gilbert draws from theoretical perspectives of anti-Blackness, ethno-sexuality, Performative Blackness and African-centered epistemology to implicate race as an inextricable factor in the sexual structures and schema of African American people. Chapters identify and introduce a sex-positive and comprehensive sexological model, Black Sexual Epistemology, through which Black sexuality can be understood and navigated in the contemporary era. This model presents empirical data for effectively applying previous critical race perspectives and uniquely demonstrates how Black sexual experience can be better understood and reimagined for greater community development and healing. This book is essential reading for practicing sex therapists, marriage and family therapists and clinical social workers working with these populations as well as for academics and students of sexology, sex education, sex therapy, social work, marriage and family therapy, public health, Black/African American studies and LGBTQ studies. It will also be of interest to general audiences who appreciate culturally centered sexological scholarship.

This dynamic health-and-wellness education program was developed at the Harvard Medical School by a leading clinician and an acclaimed curriculum designer. It addresses critical issues of body preoccupation and reduces risk for disordered eating in girls (grades 3-8). Emphasizing girls' personal power and overall mental and physical well-being, Full of Ourselves contains a range of upbeat units that foster: increased self and body acceptance; healthier eating and exercise habits; leadership and media literacy skills; and a range of coping skills for resisting unhealthy peer and cultural pressures. Each unit ends with a "Call to Action" to help girls translate their new-found knowledge into positive action at school, home, and in their community. Older girls are trained as peer leaders and given the opportunity to pass along their learning to younger peers. Evaluated with more than 800 girls, this primary prevention curriculum is the first of its kind to show sustained, positive changes in girls' body image, body satisfaction, and body esteem. Educators, health professionals, counselors, and parents will find Full of Ourselves the ideal resource for helping girls make healthy choices for themselves.
