A tissue type test is a blood test that identifies substances called antigens on the surface of body cells and tissues. Checking the antigens can tell if donor tissue is safe (compatible) for transplant to another person. This test may also be called HLA typing. Based on the antigens, the immune system can tell the...

I just took the test today and it is essentially 2 tests (easy really). The first test is a phone call script test in which you have to fill in data based on a prerecorded script. This test focuses on listening and is just as sensitive to "misclicks" as the typing test/excel test. It's basically a 10 minute timed audio/typing test.
