Blends memoir and legal cases to show how contracts can create family relationships Most people think of love and contracts as strange bedfellows, or even opposites. In *Love's Promises*, however, law professor Martha Ertman shows that far from cold and calculating, contracts shape and sustain families. Blending memoir and law, Ertman delves into the legal cases, anecdotes, and history of family law to show that love comes in different packages, each shaped by different contracts and mini-contracts she calls "deals." Family law should and often does recognize that variety because legal rules, like relationships, aren't one size fits all. The most common form of family—which Ertman calls "Plan A"—come into being through different kinds of agreements than the more uncommon families that she dubs "Plan B." Recognizing the contractual core of all families shows that Plan B is neither unnatural nor unworthy of legal recognition, just different. After telling her own moving and often irreverent story about becoming part of a

Plan B family of two moms and a dad raising a child, Ertman shows that all kinds of people—straight and gay, married and single, related by adoption or by genetics—use contracts to shape their relationships. As couples navigate marriage, reproductive technologies, adoption, and cohabitation, they encounter contracts. Sometimes hidden and other times openly acknowledged, these contracts ensure that the people they think of as “ family ” are legally recognized as family in the eyes of the law. Family exchanges can be substantial, like vows of fidelity, or small, like “ I cook and you clean. ” But regardless of scope, the agreements shape the emotional, social, and financial terrain of family relationships. Seeing the instrumental role contracts will help readers better understand how contracts and deals work in their own families as well as those around them. Both insightful and paradigm-shifting, Love ’ s Promises lets readers in on the power of contracts and deals to support love in its many forms and to honor the different ways that our nearest and dearest contribute to our daily lives.

A rollicking guided tour of one extraordinary summer, when some of the most pivotal and freakishly coincidental stories all collided and changed the way we think about modern sports The summer of 1984 was a watershed moment in the birth of modern sports when the nation watched Michael Jordan grow from college basketball player to professional

athlete and star. That summer also saw ESPN ' s rise to media dominance as the country ' s premier sports network and the first modern, commercialized, profitable Olympics. Magic Johnson and Larry Bird ' s rivalry raged, Martina Navratilova and John McEnroe reigned in tennis, and Hulk Hogan and Vince McMahon made pro wrestling a business, while Donald Trump pierced the national consciousness as a pro football team owner. It was an awakening in the sports world, a moment when sports began to morph into the market-savvy, sensationalized, moneyed, controversial, and wildly popular arena we know today. In the tradition of Bill Bryson ' s *One Summer: America, 1927*, L. Jon Wertheim captures these 90 seminal days against the backdrop of the nostalgia-soaked 1980s, to show that this was the year we collectively traded in our ratty Converse for a pair of sleek, heavily branded, ingeniously marketed Nikes. This was the year that sports went big-time.

"In *Empowerment: The Competitive Edge in Sports, Business & Life* high-profile personality Dr. Gene Landrum presents, in a self-help format, the 13 winning behaviors modeled by the 13 greatest athletes of the modern era. Landrum's research into the lives of the great entrepreneurs and athletes, supported by a growing body of evidence, suggests that eminence, whether in business or sports derives not from genetic superiority, but from winning behaviors and learned emotional dispositions. With a delightful blend of gifted story-telling and intellectual scholarship, Dr. Landrum has created a book that melds the recent discoveries in psychology and brain research with the dramatic performances of the world's greatest athletes. Charismatic athletes such as Michael Jordan, Lance Armstrong, Martina Navratilova and Tiger Woods are analyzed in psycho-biographical profiles that focus on the

underlying motivations and behaviors of these preeminent personalities rather than on what they achieved. In this respect and in its connection to the recent research in brain function and psychology, Dr. Landrum's work is unprecedented in the extant literature on athletes and athletic technique."--Amazon.com.
