Managerial accounting provides the information needed to fuel the decision-making process. Managerial decisions can be categorized according to three interrelated business processes: planning, directing, and controlling. Correct execution of each of these activities culminates in the creation of business value.

[Planning, Directing, And Controlling ...](#)

A management accounting interpretation is that the assets or resources come from the creditors (liabilities) and the owners (capital). It is management responsibilities to manage both sides of the equation. That is, management must make decisions about both the resources (assets) and the sources of the assets (liabilities and capital).

[Management Accounting and Decision-Making](#)

Managerial accountants control company activities by comparing actual results with predicted results. Management accountants prepare monthly budget reports by listing actual expenses and budgeted expenses then calculating the difference.

[Planning Vs. Controlling Managerial Accounting | Bizfluent](#)

Cost accounting gives management information about how much products, projects, processes and services cost the company. It helps management take steps to control costs. Cost accounting helps management set prices. Once a company knows the cost of its goods, it can set prices based on the profits it wants.
