The revised edition of the highly successful Nelson Advanced Science series for A Level Chemistry - Transition Metals, Quantitative Kinetics and Applied Organic Chemistry provides full content coverage of Unit 5 of the AS and A2 specifications.

Nelson Advanced Science: Chemistry is a series of four high quality student books for senior chemistry.

This book constitutes the refereed proceedings of the 10th International Conference on High-Performance Computing, HiPC 2003, held in Hyderabad, India in December 2003. The 48 revised full papers presented together with 5 keynote abstracts were carefully reviewed and selected from 164 submissions. The papers are organized in topical sections on performance issues and power-aware systems; distributed and network algorithms; routing in wireless, mobile, and cut-through networks; scientific and engineering applications; overlay networks, clusters, and grids; scheduling and software algorithms; network design and performance; grid applications and architecture support; performance analysis; scheduling and migration.

Make the Grade offers comprehensive exam support for AS and A2 Chemistry. Part of the Nelson Advanced Science series it provides activities and questions for use throughout the course, with exam questions, including synoptic questions, to help students fully prepare for examinations.

This indispensable book describes lubricant additives, their synthesis, chemistry, and mode of action. All important areas of application are covered, detailing which lubricants are needed for

a particular application. Laboratory and field performance data for each application is provided and the design of cost-effective, environmentally friendly technologies is fully explored. This edition includes new chapters on chlorohydrocarbons, foaming chemistry and physics, antifoams for nonaqueous lubricants, hydrogenated styrene–diene viscosity modifiers, alkylated aromatics, and the impact of REACh and GHS on the lubricant industry.

One hundred years on from the Dangerous Drugs Act of 1920, this book examines the money, politics and exploitation behind drugs and raises the question nobody asks: “What kind of drugs policy do we actually want in the UK?”
