Mitsubishi Manual Transmission Fluid

Manual Transmission Fluid (MTF) For smooth gear rotation and change, a sufficient quantity of manual transmission fluid is necessary. To avoid any potential mechanical problems and ensure reliable performance, MTF replacement of Mitsubishi Genuine Fluid is recommended with periodical maintenance schedules.

### Transmission Fluid

An automatic transmission fluid of the same name is recommended for Mitsubishi vehicles with automatic transmissions. Changing manual transmission fluid is recommended to maintain a smooth transition between gears. Manual transmissions running dirty fluid often exhibit loud noises when shifting gears, and the gears eventually become damaged.

...

This fluid is used in most Mitsubishi manual transmissions. With this fluid you will get the best shift quality with long bearing and thrust life. Gear tooth wear will also be smooth and shiny unlike many other oils out there which give a smeared and wiped out look to the tooth due to the fluid's inability to withstand high torque conditions.

Start pouring the GL-4 manual transmission fluid through the fill hole until it runs out of the fill hole. Once the fluid comes out of the fill hole, the transmission is full. Remove the plastic tube from the fill hole and screw the fill plug back in. Tighten the fill plug with the ratchet and the 17mm socket.
