you can make sense of all kinds of numbers - without a calculator or a computer!

The written addition most of us learn in school relies on

simple and slow systems like  
"carry the 1" to get  
answers. There is an  
alternative - Vedic math  
moves at the speed of  
thought. Instead of summing  
columns and moving from  
right to left, Vedic math

starts on the left. Add the largest numbers in your head, remember this figure, sum the smaller numbers - and then just total the figures in your head! By holding numbers in your head while calculating others,

Advanced Calculation And

way you were taught to do math, uses a lot of working memory. Working memory is the short term memory used to complete a mental task. You struggle because trying to do mental math the way you were taught in school,

# Get Free Secrets Of Mental Math Master The Art

overloads your working  
memory. Let me show you what  
I mean with an example: Try  
to multiply the  $73201 \times 3$ .  
To do this you multiply the  
following:  $1 \times 3 = 0 \times 3 = 2 \times$   
 $3 = 3 \times 3 = 7 \times 3 =$  This wasn't  
hard, & it might have taken

# Get Free Secrets Of Mental Math Master The Art

you just seconds to multiply  
the individual numbers.  
However, to get the final  
answer, you need to remember  
every single digit you  
calculated to put them back  
together. It takes effort to  
get the answer because you

# Get Free Secrets Of Mental Math Master The Art

spend time trying to recall the numbers you already calculated. Math would be easier to do in your head if you didn't have to remember so many numbers. Imagine when you tried to multiply  $73201 \times 3$ , if you could have

# Get Free Secrets Of Mental Math Master The Art

Advanced Calculation And  
Memorization All In Your

come up with the answer, in the time it took you to multiply the individual numbers. Wouldn't you have solved the problem faster than the time it would have taken you to punch in the numbers inside a calculator?

# Get Free Secrets Of Mental Math Master The Art

Do the opposite of what you were taught in school. The secret of doing mental math is to calculate from left to right instead of from right to left. This is the opposite of what you were taught in school. This works

# Get Free Secrets Of Mental Math Master The Art

so well because it frees  
your working memory almost  
completely. It is called the  
LR Method where LR stands  
for Left to Right. Lets try  
to do the earlier example  
where we multiplied  $73201 \times 3$ . This time multiply from

# Get Free Secrets Of Mental Math Master The Art

left to right, so we get:  $7 \times 3 = 21$   $3 \times 3 = 9$   $2 \times 60 = 120$   $3 \times 1 = 3$  Notice that you started to call out the answer before you even finished the whole multiplication problem. You don't have to remember a

# Get Free Secrets Of Mental Math Master The Art

thing to recall & use later.  
So you end up doing math a  
lot faster. The Smart  
Choice You could use what you  
learnt & apply it to solve

might not be easy, because  
we just scratched the
