"High Performance Team Coaching (HPTC) is a fantastic resource and a 'must read' for all Team Leaders and Coaches. The authors demystify the concepts of creating and sustaining high performance teams and how to lead and coach them. Built upon solid research and investigation along with practical and relevant action steps, it is a resource that will help move your team from average or good, to high performance in any context." - Lillas Marie Hatala and Richard Hatala, Co-authors of Integrative Leadership: Building a Foundation for Personal, Interpersonal, and Organizational Success "With a combination of systematic field research and an intense scrutiny of the literature, Peters and Carr have developed a system of high performance team coaching that is fit-for-purpose and accessible for practitioners but with an appropriate and transparent evidence base. It provides the framework and underpinning that will allow this much needed [team coaching] modality to achieve its potential." - Dr. Annette Fillery-Travis, M/DProf Programme Coordinator, Middlesex University Member of the Steering Group of the International Centre for the Study of Coaching "High Performance Team Coaching advances the field of coaching by filling the gap for a practical, yet thoroughly evidence-based model to guide team coaching practice. Drawing on the authors' considerable experience and their recent empirical research this clearly written, well-documented text provides actionable guidelines and practical strategies for working with teams and makes a genuine and important contribution to the field." - Dr. Elaine Cox, Editor: International Journal of Evidence Based Coaching and Mentoring Director of Postgraduate Coaching & Mentoring Programmes, Oxford Brookes University

"This book is a must for anyone involved in organizational coaching' Adrian Moorhouse, Managing Director, Lane4 & Olympic Gold Medalist Coaching the Team at Work, 4e is the result of research over 20 years with practising team coaches and with major corporations around the world. It recognises that in a complex and constantly evolving business and social environment, teams can only keep up if they adapt frequently. But to adapt, they must have clarity about their internal and external systems and how these contribute to or undermine performance. There are multiple aspects of team function that underpins performance - and each influences and is influenced by the others. This revised edition explores the six most significant aspects: * Purpose and motivation * Systems and processes relating to external stakeholders * Relationships, especially within the team * Systems and processes relating to internal functions (such as quality and decision-making) * Learning (how the team adapts to keep up with the pace of change) * Leadership (how the functions of leadership are exercised within the team) When these aspects are aligned, a team can perform at its best; but when any one or more of the aspects is malfunctioning, the result is underperformance. This book helps team coaches develop their skills to support teams in understanding these complex dynamics and, as a result, in developing more effective ways of working together.

Organizations are most effective when the teams responsible for their success function to the best of their ability. When the relationships within the team work well and all members have a clear focus, the team is able to achieve goals more easily. Leadership Team Coaching is a roadmap for those who have the responsibility of developing a leadership team. It provides a thorough explanation of the key elements of team coaching and is filled with practical tools and techniques to facilitate optimum performance across virtual teams, international teams, executive boards and other teams. The fully updated 3rd edition of Leadership Team Coaching brings together the latest research in leadership teams and team coaching along with numerous examples to illustrate how to develop people from disparate groups into a high-performing team. With new international case studies throughout as well as a new chapter on systemic coaching, the book covers the five disciplines of team performance, how to select team members, how the relationship of the coach and the team develops through stages, how CEOs can foster effective teams with shared leadership, how to choose the best team coach and more to facilitate effective leadership teams.

The world's challenges are becoming more and more complex and adapting to those challenges will increasingly come from teams of people innovating together. It seeks to enhance practice through illustrating and exploring an array of contextual issues and complexities entrenched in it. To do so, the editorial team presents, synthesizes and integrates relevant theories, research and practices that comprise and undergird team coaching. This book is, therefore, an invaluable specialist tool for team coaches of all levels; from novice to seasoned practitioners. This book is essential reading for anyone with an interest in coaching, in both practice and educational settings. It will be of use not only for professional coaches, but also for leaders, managers, HR professionals, learners and educators, in the business, public, independent and voluntary sectors.

The missing how-to manual for being an effective team leader The Art of Coaching Teams is the manual you never received when you signed on to lead a team. Being a great teacher is one thing, but leading a team, or team development, is an entirely different dynamic. Your successes are public, but so are your failures—and there's no specific rubric or curriculum to give you direction. Team development is an art form, and this book is your how-to guide to doing it effectively. You'll learn the administrative tasks that keep your team on track, and you'll gain access to a wealth of downloadable tools that simplify the "getting organized" process. Just as importantly, you'll explore what it means to be the kind of leader that can bring people together to accomplish difficult tasks. You'll find practical suggestions, tools, and clear instructions for the logistics of team development as well as for building trust, developing healthy communication, and managing conflict. Inside these pages you'll find concrete guidance on: Designing agendas, making decisions, establishing effective protocols, and more Boosting your resilience, understanding and managing your emotions, and meeting your goals Cultivating your team's emotional intelligence and dealing with cynicism Utilizing practical tools to create a customized framework for developing highly effective teams There is no universal formula for building a great team, because every team is different. Different skills, abilities, personalities, and goals make a one-size-fits-all approach ineffective at best. Instead, The Art of Coaching Teams provides a practical framework to help you develop your group as a whole, and keep the team moving toward their common goals.
