Similar to HTML, CSS is a tool used for web design. In fact, HTML and CSS go hand in hand when it comes to designing a nice-looking website. The main difference between the two is that HTML is used mainly for creating the content of the website, while CSS is used for styling that content. HTML is a useful tool for creating a website, but without CSS your website would look very bland indeed.

### Basic Web Design With HTML & CSS - Owlcation - Education

HTML is an abbreviation for Hyper Text Markup Language. CSS is an abbreviation for Cascading Style Sheets. HTML is actually used to create the webpage and the content that it has, like the images and writing. CSS is used to design the webpage and tell the writing and images to be in a certain place, like an image on the top of the page, another in the center etc... WebFonts is a technology that enables people to use fonts on demand over the Web without requiring installation in the operating system. W3C has experience in downloadable fonts through HTML, CSS2, and SVG. Until recently, downloadable fonts have not been common on the Web due to the lack of an interoperable font format. The WebFonts effort plans to address that through the creation of an industry-supported, open font format for the Web (called "WOFF"). Examples
